**SECTION 3 HAZARDOUS IDENTIFICATION**

**Primary Entry Routes:** Inhalation

**Carcinogenicity:**

Carbon Black was reclassified as a Group 2B by IARC in 1996 based on the result of only the inhalation study in rats. However there was not observed the incidence of tumors on the that results on dermal or oral studies. Also 2-years inhalation study using toner containing carbon black showed no association between toner exposure and animal tumors.

**Medical Conditions Aggravated By Exposure:** Not Applicable

**Chronic Effects:**

Prolonged inhalation of excessive dust may cause lung damage. It is attributed to "lung overloading", a generic response to excessive amounts of any dust retained in the lung for a prolonged interval. Use of this product, as intended, does not result in inhalation of excessive dust.

**SECTION 4 FIRST AID MEASURES**

**Inhalation:** Gargle with water, move to place in fresh air. If unsuccessful, get medical attention.

**Eye Contact:** In case of contact immediately flush with plenty of low pressure water for at least 15 minutes. Remove any contact lenses to ensure thorough flushing.

**Skin Contact:** Wash well with soap and running water.

**Ingestion:** Dilute stomach contents with several glasses of water. If unsuccessful, get medical attention.

## Section 5 FIRE FIGHTING MEASURES

Flash Point:	N/A
Flash Point Method:	N/A
Burning Rate:	N/A
Auto Ignition Temperature:	Not Determined
LEL:	N/A
UEL:	N/A
Flammability Classification:	1 Slight ( HMIS, NFPA )
Extinguishing Media:	Water spray (mist), dry chemical, foam, carbon dioxide may be suitable.
Unusual Fire or explosion hazards:	May form flammable dust-air mixture.
Hazardous combustion products:	Carbon monoxide, carbon dioxide, nitrogen oxide and smoke. Under certain conditions some aliphatic aldehydes and carboxylic acids may form.
Fire- Fighting Instructions:	Do not release runoff from fire control methods to sewers or waterways.
Fire-Fighting Equipment:	Because fire may produce toxic thermal decomposition products, wear a self-contained breathing apparatus ( SCBA ) with full face piece operated in pressure-demand or positive-pressure mode.

## SECTION 6 ACCIDENTAL RELEASE MEASURES

Spill / Leak Procedures:	N/A
Small Spills:	Scoop into container for disposal, suction up remaining material with high efficiency vacuum cleaner.
Large Spills:	Scoop into container for disposal, suction up remaining material with high efficiency vacuum cleaner.
Containment:	For large spills, avoid suspending particles, collect for later disposal. Do not release into sewers or waterways.
Cleanup:	No special requirements.
REGULATORY REQUIREMENT :	N/A

## SECTION 7 HANDLING AND STORAGE

Handling Precautions:	Keep containers closed at all times. Avoid creating dust. Keep away from ignition sources.
Storage Requirements:	Store in a cool, dry location, below 35C (95F).
Regulatory Requirements:	N/A

## SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering Controls:	
Ventilation:	Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs (sec.2). Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.
Administrative Controls:	
Respiratory Protection:	Seek professional advise prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA/NIOSH-approved respirator. select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. For emergency or nonroutine operation ( cleaning spills, reactor vessels, or storage tanks), wear an SCBA. <i>Warning! Air-purified respirators do not protect workers in oxygen-deficient atmospheres.</i>
Protective Clothing/Equipment:	Wear chemically protective gloves, boots, aprons, and gauntlets to prevent prolonged or repeated skin contact. Wear protective eyeglasses or chemical safety goggles, per OSHA eye-and face-protection regulations (29CFR 1910.133). Contact lenses are not eye protective devices. appropriate protection must be worn instead of, or in conjunction with contact lenses.
Safety Stations:	Make emergency eyewash stations and washing facilities available in work area.
Contaminated Equipment:	Separate contaminated work clothing from street clothes. Launder before re-use. Remove this material from your shoes and clean personal protective equipment.
Comments:	Never eat, drink, or smoke in work areas. Practice good personal hygiene after using this material, especially before eating, drinking using the toilet, or applying cosmetics

**Special Effects:**

**Carcinogenicity:** In 1996 IARC reevaluated Carbon Black as a Group 2B carcinogen (possible human carcinogen). This evaluation is given to carbon black for which there is inadequate human evidence, but sufficient animal evidence. The latter is based upon the development of lung tumors in rats receiving chronic inhalation exposures to free carbon black at levels that induce particle overload of the lung. Studies performed in animal models other than rats have not demonstrated an association between carbon black and lung tumors. Moreover, 2-years cancer bioassay using a typical toner preparation containing carbon black did not demonstrate an association between toner exposure and tumor development in rats.
